EDUCATION

Anhanguera University — **Brazil**
B.S. in Software Engineering (6th semester) — *Expected June 2027*

Instituto de Cultura Técnica — **RJ, Brazil**
Technical Degree in Mechatronics — *December 2020*

PROFESSIONAL EXPERIENCE

Automate Army — **United States (Remote)**
Software Engineer Intern — *September 2026 – Present*

- Work in a fully international environment, conducting all technical communication, documentation, and team collaboration in English.
- Develop backend features for the internal platform that the whole company runs on, focusing on REST API architecture, MCP (Model Context Protocol) integrations, and data ingestion, using TypeScript, React.js, and Next.js on Google Cloud Platform.
- Co-developed a time-tracking timer that logs hours worked per ticket, integrated with Plane (ticketing platform), allowing the company to stop paying for Clockify, a paid tool, and reduce software costs.
- Build automated employee onboarding and offboarding workflows integrated with Google Workspace and Identity-Aware Proxy (IAP).
- Contribute to architectural decisions and structural improvements; study ClickHouse and PostgreSQL for the data layer.

Cesar Garcia TI — **Volta Redonda, RJ, Brazil**
IT Technician — *October 2024 – August 2025*

- Diagnosed and resolved hardware and software failures, reducing corporate client downtime by 25%.
- Installed and configured networks and servers, ensuring high infrastructure availability.

Projeto Vida (Events) — **Volta Redonda, RJ, Brazil**
Simultaneous Interpreter (On-demand) — *December 2023 – Present*

- Delivered real-time English/Portuguese interpretation at international events, communicating clearly and accurately under pressure.

PROJECTS

Aliança Barber Club · aliancabarberclub.com.br — **April 2026 – Present**
Next.js, TypeScript, React, Tailwind CSS, Supabase (PostgreSQL & Auth)

- Built a multi-tenant SaaS in production with real clients and users: 4-step booking flow, CRM, financial dashboard, and inventory management, delivered end to end from requirements to deploy.
- Engineered a booking engine with business-rule analysis and database-level RPCs, reducing scheduling time by 40% and preventing double-bookings.
- Implemented Row Level Security (RLS) and PKCE authentication in Supabase to isolate each business's data.

RAG Chatbot · rag-chatbot-mocha-omega.vercel.app — **2026**
Python, FastAPI, React, Gemini API, RAG, Vercel

- Built a document-analysis chatbot with a full RAG pipeline (chunking, embeddings, semantic retrieval) over uploaded PDFs, with a Python/FastAPI backend and a React frontend, in production on Vercel.

SKILLS

Languages: TypeScript, JavaScript, Python, HTML, CSS
Frameworks & Libraries: Next.js, React.js, Node.js, FastAPI, Tailwind CSS
APIs & Integrations: REST APIs, Model Context Protocol (MCP), Google Workspace API, IAP
Databases: PostgreSQL, Supabase, ClickHouse, MySQL
Cloud & DevOps: Google Cloud Platform (GCP), Vercel, CI/CD, Docker
AI & LLM: RAG, Gemini API, Embeddings
Tools & Methods: Git, GitHub, Scrum, Kanban, Row Level Security, Multi-tenancy
Languages (spoken): Portuguese (native), English (professional, daily use)
